

**Session 1 : The ULISSE project**

Project of extension of the Laboratoire Souterrain de Modane	Fabrice Piquemal (LSM)
--	------------------------

**Session 2 : Dark Matter**

EDELWEISS	Gilles Gerbier (CEA Saclay )
EURECA	H. Kraus (Oxford)
XENON	Elena Aprile (Columbia)

**Coffee break****Session 3 : Neutrino Physics**

NEMO	Christine Marquet (CENBG, France)
SUPERNEMO	Ruben Saakyan (UCL, UK)

**Lunch 12:30-14:00**

Large gas detectors for neutrinos from supernovae	Ioannis Giomataris (CEA Saclay)
---	---------------------------------

**Session 4 : Interdisciplinary Activities**

Soft Error Rate testing	Jean-Luc Autran (Marseille)
Environmental measurements	Fabian Arnaud (Chambery)
Applications to oceanography	Peter VanBeek (Toulouse)
Rock deformation with interferometry	Luca Crescentini (INFN, Salerno)

**Coffee break****Session 5 : Very low level radiation measurements**

Neutron background at the Laboratoire Souterrain de Modane	Evgeny Yakushev(Dubna)
Gamma and Radon background at the Laboratoire Souterrain de Modane	Pia Loaiza (LSM)

**Safety issues**

Laboratory access and safety	Michel Zampaolo (LSM)
------------------------------	-----------------------

**Open contributions**
